Thieves Don't Steal What They Can't Sell.

A thick, resistant, customizable, permanently bonded Security Tag leaves an indelible "Stolen Property" tattoo if removed. Deters theft by eliminating illicit resale value and the incentive to steal your mobile devices. Facilitates return of lost items.

Theft Deterrence and Recovery

Permanently Affixed, Bar-Coded Flexible Tag for a Lifetime of Protection

The STOPFlex Security Tag uses a rugged subprinted polycarbonate tag that affixes to any device that is vulnerable to theft or loss. The permanently bonded STOPFlex Security Tag clearly marks all your valuable devices as an obvious liability for a would-be thief. Extremely difficult to remove, STOPFlex Security Tags provide a clear warning that your device is registered and monitored in our Online Registration Database. The tag can be customized with your own logo, web page URL or message to facilitate return of tagged devices.

STOPFlex Security Tag

Technical Specifications

Theft Deterrence and Recovery

Permanently Bonded “Stolen Property” Tattoo Eliminates Illicit Resale Value

Our “Stolen Property” tattoo, hidden beneath the STOPFlex Security Tag, remains chemically bonded to the device if the Tag is removed, making illicit resale impossible.

Online Registration System

The STOPFlex Security Tag system acts as a physical theft deterrence, inventory management and recovery system. The face of the STOPFlex Security Tag is marked with a unique STOP ID number registered in our secure Online Registration System. This database lists and links the device information and STOP ID number to its owner.

Recovery

Our many recovery stories demonstrate that the STOP system helps return lost or stolen mobile devices by immediately identifying the rightful owner. Our Website address and our toll-free recovery hotline numbers are also marked on the Security Tag, providing an easy way for finders to “do the right thing” by contacting us as soon as they find the device protected by STOP.

A customizable QR code can also direct enquiries to the personalized landing page of your choice.

Bond Strength and Tattoo

Tag Adhesive: Very High peel strength .0035” thick pressure-sensitive adhesive providing excellent resistance to heat and chemicals

Tattoo Activating Gel: Cyanoacrylate Adhesive Gel

Each STOPFlex Security Tag is backed with a double-sided transfer tape. In addition, an Instant Adhesive Gel is used to permanently bond the “Stolen Property” tattoo to the surface of the device.

The combination of these two adhesives creates a strong, permanent bond to a wide range of substrates.

Our experience since our inception in 1991 with over 2,500,000 applications on a wide range of substrates shows that our STOPFlex Security Tag adhesives will bond as claimed provided they are installed according to our installation instructions. Our “Stolen Property” tattoo provides additional protection even if a determined thief removes the STOPFlex Security Tag.
